### 【完形填空】

"The Internet affords anonymity to its users — a boon to privacy and freedom of speech. But that very anonymity is also behind the explosion of cybercrime that has 1 across the Web.

Can privacy be preserved 2 bringing a semblance of safety and security to a world that seems increasingly 3 ?

Last month, Howard Schmidt, the nation's cyberczar, offered the Obama government a 4 to make the Web a safer place — a "voluntary identify" system that would be the high-tech 5 of a physical key, fingerprint and a photo ID card, all rolled 6 one. The system might use a smart identity card, or a digital credential 7 to a specific computer, and would authenticate users at a range of online services.

The idea is to 8 a federation of private online identify systems. Users could 9 which system to join, and only registered users whose identities have been authenticated could navigate those systems. The approach contrasts with one that would require an Internet driver's license 10 by the government.

Google and Microsoft are among companies that already have sign-on" systems that make it possible for users to 11 just once but use many different services.

12 , the approach would create a "walled garden" in safe "neighborhoods" and bright "streetlights" to establish a sense of 13 community.

Mr. Schmidt described it as a "voluntary ecosystem" in which individuals and organizations can complete online transactions with 14 , trusting the identities of the infrastructure that the transaction runs 15 ."

Still, the administration's plan has 16 privacy rights activists. Some applaud the approach; others are concerned. It seems clear that such an initiative push toward what would 17 be a license" mentality.

The plan has also been greeted with 18 by some experts, who worry that the "voluntary ecosystem" would still leave much of the Internet 19 . They argue that should be 20 to register and identify themselves, in drivers must be licensed to drive on public roads.

1. A. swept B. skipped C. walked D. ridden

2. A. for B. within C. while D. though

3. A. careless B. lawless C. pointless D. helpless

4. A. reason B. reminder C. compromise D. proposal

5. A. information B. interference C. entertainment D. equivalent

6. A. by B. into C. from D. over

7. A. linked B. directed C. chained D. compared

8. A. dismiss B. discover C. create D. improve

9. A. recall B. suggest C. select D. realize

10. A. released B. issued C. distributed D. delivered

11. A. carry on B. linger on C. set in D. log in

12. A. In vain B. In effect C. In return D. In contrast

13. A. trusted B. modernized C. thriving D. competing

14. A. caution B. delight C. confidence D. patience  
15. A. on B. after C. beyond D. across  
16. A. divided B. disappointed C. protected D. united  
17. A. frequently B. incidentally C. occasionally D. eventually  
18. A. skepticism B. tolerance C. indifference D. enthusiasm  
19. A. manageable B. defensible C. vulnerable D. invisible  
20. A. invited B. appointed C. allowed D. forced

Text 1

Ruth Simmons joined Goldman Sachs' board as an outside director in January 2000; a year later she became president of Brown University. For the rest of the decade she apparently managed both roles without attracting much criticism. But by the end of 2009 Ms. Simmons was under fire for having sat on Goldman's compensation committee; how could she have let those enormous bonus payouts pass unremarked? By February the next year Ms. Simmons had left the board. The position was just taking up too much time, she said.

Outside directors are supposed to serve as helpful, yet less biased, advisers on a firm's board. Having made their wealth and their reputations elsewhere, they presumably have enough independence to disagree with the chief executive's proposals. If the sky is falling, and the share price is falling, outside directors should be able to give advice based on having weathered their own crises.

The researchers from Ohio University used a database that covered more than 10,000 firms and more than 64,000 different directors between 1989 and 2004. Then they simply checked which directors stayed from one proxy statement to the next. The most likely reason for departing a board was age, so the researchers concentrated on those "surprise" disappearances by directors under the age of 70. They found that after a surprise departure, the probability that the company will subsequently have to restate earnings increased by nearly 20%. The likelihood of being named in a federal class-action lawsuit also increases, and the stock is likely to perform worse. The effect tended to be larger for larger firms. Although a correlation between them leaving and subsequent bad performance at the firm is suggestive, it does not mean that such directors are always jumping off a sinking ship. Often they "trade up." Leaving riskier, smaller firms for larger and more stable firms.

But the researchers believe that outside directors have an easier time of avoiding a blow to their reputations if they leave a firm before bad news breaks, even if a review of history shows they were on the board at the time any wrongdoing occurred.

Firms who want to keep their outside directors through tough times may have to create incentives. Otherwise outside directors will follow the example of Ms. Simmons, once again very popular on campus.

21. According to Paragraph 1, Ms. Simmons was criticized for .

- [A]gaining excessive profits
- [B]failing to fulfill her duty
- [C]refusing to make compromises
- [D]leaving the board in tough times

22. We learn from Paragraph 2 that outside directors are supposed to be .

- [A]generous investors
- [B]unbiased executives
- [C]share price forecasters
- [D]independent advisers

23. According to the researchers from Ohio University after an outside director' s surprise departure, the firm is likely to .

- [A]become more stable
- [B]report increased earnings
- [C]do less well in the stock market
- [D]perform worse in lawsuits

24. It can be inferred from the last paragraph that outside directors .

- [A]may stay for the attractive offers from the firm
- [B]have often had records of wrongdoings in the firm
- [C]are accustomed to stress-free work in the firm
- [D]will decline incentives from the firm

25. The author' s attitude toward the role of outside directors is .

- [A]permissive
- [B]positive
- [C]scornful
- [D]critical

#### Text 2

Whatever happened to the death of newspaper? A year ago the end seemed near.

The recession threatened to remove the advertising and readers that had not already fled to the internet. Newspapers like the San Francisco Chronicle were chronicling their own doom. America' s Federal Trade commission launched a round of talks about how to save newspapers. Should they become charitable corporations? Should the state subsidize them? It will hold another meeting soon. But the discussions now seem out of date.

In much of the world there is the sign of crisis. German and Brazilian papers have shrugged off the recession. Even American newspapers, which inhabit the most troubled corner of the global industry, have not only survived but often returned to profit. Not the 20% profit margins that were routine a few years ago, but profit all the same.

It has not been much fun. Many papers stayed afloat by pushing journalists overboard. The American Society of News Editors reckons that 13,500 newsroom jobs have gone since 2007. Readers are paying more for slimmer products. Some papers even had the nerve to refuse delivery to distant suburbs. Yet these desperate measures have proved the right ones and, sadly for many journalists, they can be pushed

further.

Newspapers are becoming more balanced businesses, with a healthier mix of revenues from readers and advertisers. American papers have long been highly unusual in their reliance on ads. Fully 87% of their revenues came from advertising in 2008, according to the Organization for Economic Cooperation & Development (OECD). In Japan the proportion is 35%. Not surprisingly, Japanese newspapers are much more stable.

The whirlwind that swept through newsrooms harmed everybody, but much of the damage has been concentrated in areas where newspaper are least distinctive. Car and film reviewers have gone. So have science and general business reporters. Foreign bureaus have been savagely cut off. Newspapers are less complete as a result. But completeness is no longer a virtue in the newspaper business.

26. By saying “Newspapers like ... their own doom” (Lines 3-4, Para. 1), the author indicates that newspaper .

- [A]neglected the sign of crisis
- [B]failed to get state subsidies
- [C]were not charitable corporations
- [D]were in a desperate situation

27. Some newspapers refused delivery to distant suburbs probably because .

- [A]readers threatened to pay less
- [B]newspapers wanted to reduce costs
- [C]journalists reported little about these areas
- [D]subscribers complained about slimmer products

28. Compared with their American counterparts, Japanese newspapers are much more stable because they .

- [A]have more sources of revenue
- [B]have more balanced newsrooms
- [C]are less dependent on advertising
- [D]are less affected by readership

29. What can be inferred from the last paragraph about the current newspaper business?

- [A]Distinctiveness is an essential feature of newspapers.
- [B]Completeness is to blame for the failure of newspaper.
- [C]Foreign bureaus play a crucial role in the newspaper business.
- [D]Readers have lost their interest in car and film reviews.

30. The most appropriate title for this text would be .

- [A]American Newspapers: Struggling for Survival
- [B]American Newspapers: Gone with the Wind
- [C]American Newspapers: A Thriving Business
- [D]American Newspapers: A Hopeless Story

### Text 3

We tend to think of the decades immediately following World War II as a time of prosperity and growth, with soldiers returning home by the millions, going off to col

lege on the G. I. Bill and lining up at the marriage bureaus.

But when it came to their houses, it was a time of common sense and a belief that less could truly be more. During the Depression and the war, Americans had learned to live with less, and that restraint, in combination with the postwar confidence in the future, made small, efficient housing positively stylish.

Economic condition was only a stimulus for the trend toward efficient living. The phrase “less is more” was actually first popularized by a German, the architect Ludwig Mies van der Rohe, who like other people associated with the Bauhaus, a school of design, emigrated to the United States before World War II and took up posts at American architecture schools. These designers came to exert enormous influence on the course of American architecture, but none more so than Mies.

Mies’ signature phrase means that less decoration, properly organized, has more impact than a lot. Elegance, he believed, did not derive from abundance. Like other modern architects, he employed metal, glass and laminated wood-materials that we take for granted today but that in the 1940s symbolized the future. Mies’ sophisticated presentation masked the fact that the spaces he designed were small and efficient, rather than big and often empty.

The apartments in the elegant towers Mies built on Chicago’s Lake Shore Drive, for example, were smaller-two-bedroom units under 1,000 square feet-than those in their older neighbors along the city’s Gold Coast. But they were popular because of their airy glass walls, the views they afforded and the elegance of the buildings’ details and proportions, the architectural equivalent of the abstract art so popular at the time.

The trend toward “less” was not entirely foreign. In the 1930s Frank Lloyd Wright started building more modest and efficient houses-usually around 1,200 square feet-than the spreading two-story ones he had designed in the 1890s and the early 20th century.

The “Case Study Houses” commissioned from talented modern architects by California Arts & Architecture magazine between 1945 and 1962 were yet another homegrown influence on the “less is more” trend. Aesthetic effect came from the landscape, new materials and forthright detailing. In his Case Study House, Ralph Pucci’s everyday life – few American families acquired helicopters, though most eventually got clothes dryers – but his belief that self-sufficiency was both desirable and inevitable was widely shared.

31. The postwar American housing style largely reflected the Americans’ .

- [A]prosperity and growth
- [B]efficiency and practicality
- [C]restraint and confidence
- [D]pride and faithfulness

32. Which of the following can be inferred from Paragraph 3 about Bauhaus?

- [A]It was founded by Ludwig Mies van der Rohe.
- [B]Its designing concept was affected by World War II.

[C]Most American architects used to be associated with it.

[D]It had a great influence upon American architecture.

33. Mies held that elegance of architectural design .

[A]was related to large space

[B]was identified with emptiness

[C]was not reliant on abundant decoration

[D]was not associated with efficiency

34. What is true about the apartments Mies building Chicago' s Lake Shore Drive?

[A]They ignored details and proportions.

[B]They were built with materials popular at that time.

[C]They were more spacious than neighboring buildings.

[D]They shared some characteristics of abstract art.

35. What can we learn about the design of the "Case Study House" ?

[A]Mechanical devices were widely used.

[B]Natural scenes were taken into consideration

[C]Details were sacrificed for the overall effect.

[D]Eco-friendly materials were employed.

Will the European Union make it? The question would have sounded strange not long ago. Now even the project' s greatest cheerleaders talk of a continent facing a "Bermuda triangle" of debt, population decline and lower growth.

As well as those chronic problems, the EU face an acute crisis in its economic core, the 16 countries that use the single currency. Markets have lost faith that the euro zone' s economies, weaker or stronger, will one day converge thanks to the discipline of sharing a single currency, which denies uncompetitive members the quick fix of devaluation.

Yet the debate about how to save Europe' s single currency from disintegration is stuck. It is stuck because the euro zone' s dominant powers, France and Germany, agree on the need for greater harmonization within the euro zone, but disagree about what to harmonize.

Germany thinks the euro must be saved by stricter rules on borrowing and competitiveness, backed by quasi-automatic sanctions for governments that do not obey. These might include threats to freeze EU funds for poorer regions and EU mega-projects and even the suspension of a country' s voting rights in EU ministerial councils. It insists that economic co-ordination should involve all 27 members of the EU club, among whom there is a small majority for free-market liberalism and economic rigour; in the inner core alone, Germany fears, a small majority favour French interference.

A "southern" camp headed by France wants something different: "European economic government" within an inner core of euro-zone members. Translated, that means politicians intervening in monetary policy and a system of redistribution from richer to poorer members, via cheaper borrowing for governments through common Eurobonds or complete fiscal transfers. Finally, figures close to the France government have murmured, euro-zone members should agree to some fiscal and social harmonization.

tion: e.g., curbing competition in corporate-tax rates or labour costs.

It is too soon to write off the EU. It remains the world's largest trading block. At its best, the European project is remarkably liberal: built around a single market of 27 rich and poor countries, its internal borders are far more open to goods, capital and labour than any comparable trading area. It is an ambitious attempt to blunt the sharpest edges of globalization, and make capitalism benign.

36. The EU is faced with so many problems that .

- [A] it has more or less lost faith in markets
- [B] even its supporters begin to feel concerned
- [C] some of its member countries plan to abandon euro
- [D] it intends to deny the possibility of devaluation

37. The debate over the EU's single currency is stuck because the dominant powers .

- [A] are competing for the leading position
- [B] are busy handling their own crises
- [C] fail to reach an agreement on harmonization
- [D] disagree on the steps towards disintegration

38. To solve the euro problem ,Germany proposed that .

- [A] EU funds for poor regions be increased
- [B] stricter regulations be imposed
- [C] only core members be involved in economic co-ordination
- [D] voting rights of the EU members be guaranteed

39. The French proposal of handling the crisis implies that \_\_\_\_.

- [A] poor countries are more likely to get funds
- [B] strict monetary policy will be applied to poor countries
- [C] loans will be readily available to rich countries
- [D] rich countries will basically control Eurobonds

40. Regarding the future of the EU, the author seems to feel \_\_\_\_.

- [A] pessimistic
- [B] desperate
- [C] conceited
- [D] hopeful

Part B Directions:(7 选 5)

In the following text, some sentences have been removed. For Questions (41-45), choose the most suitable one from the list A-G to fit into each of the numbered blank. There are two extra choices, which do not fit in any of the gaps. Mark your answers on ANSWER SHEET 1. (10 points)

Such a move could affect firms such as McDonald's, which sponsors the youth coaching scheme run by the Football Association. Fast-food chains should also stop offering "inducements"

such as toys, cute animals and mobile phone credit to lure young customers, Stephenson said.

Professor Dinesh Bhugra, president of the Royal College of Psychiatrists, said: "If children

are taught about the impact that food has on their growth, and that some things can harm, at least information is available up front.”

He also urged councils to impose “fast-food-free zones” around school and hospitals-areas within which takeaways cannot open.

A Department of Health spokesperson said: “We need to create a new vision for public health where all of society works together to get healthy and live longer. This includes creating a new „responsibility deal” with business, built on social responsibility, not state regulation. Later this year, we will publish a white paper setting out exactly how we will achieve this.”

The food industry will be alarmed that such senior doctors back such radical moves, especially the call to use some of the tough tactics that have been deployed against smoking over the last decade.

41. Andrew Lansley held that

42. Terence Stephenson agreed

43. Jamie Oliver seemed to believe that

44. Dinesh Bhugra suggested that

45. A Department of Health Spokesperson proposed that

[A] “fat taxes” should be imposed on fast-food producers such as McDonald’s.

the government should ban fast-food outlets in the neighborhood of schools.

[C] “lecturing” was an effective way to improve school lunches in England.

[D] cigarette-style warnings should be introduced to children about the dangers of a poor diet.

[E] the producers of crisps and candies could contribute significantly to the Change4Life campaign.

[F] parents should set good examples for their children by keeping a healthy diet at home.

[G] the government should strengthen the sense of responsibility among businesses.

### Section III Translation

#### 46. Directions:

In this section there is a text in English. Translate it into Chinese. Write your translation on ANSWER SHEET 2. (15 points)

Who would have thought that, globally, the IT industry produces about the same volume of greenhouse gases as the world’s airlines do --- roughly 2 percent of all CO<sub>2</sub> emissions?

Many everyday tasks take a surprising toll on the environment. A Google search can leak between 0.2 and 7.0 grams of CO<sub>2</sub>, depending on how many attempts are needed to get the “right”

answer. To deliver results to its users quickly, then, Google has to maintain vast data centres around the world, packed with powerful computers. While producing large quantities of CO<sub>2</sub>, these computers emit a great deal of heat, so the centres need to be well air-conditioned, which uses even more energy.

However, Google and other big tech providers monitor their efficiency closely and make improvements. Monitoring is the first step on the road to reduction, but there is much more to be done, and not just by big companies.

小作文真题:

suppose your cousin LI MING has just been admitted to a university write him/her a letter to:

(1) Congratulate him/her, and

(2) give him/her suggestions on how to get prepared for university life

you should write about 100 words on ANSWER SHEET 2. DO not sign your own name at the end of the letter, Use "zhangwe"

小作文范文:

Dear friend,

I am writing to congratulate you on your being successfully admitted to Harvard University, which enjoys an international reputation for its academic excellence and give you some suggestions as to how to make preparation for the coming college life.

In order for you to adapt yourself to the university life, you are advised to get prepared physically and intellectually. First and foremost, you need to build a strong body for the future academic pursuit, so you can take some exercises during the breaks. Secondly, since the study in university is more demanding than in your secondary school, you are highly suggested to find some introductory books from the library so as to have a good idea of the specialty you are going to take in your college life.

Given your sound ability, you are sure to have a successful college life.

Congratulate you again and wish you a fruitful college life.

Sincerely yours,

Zhang Wei

2011 年考研英语二大作文真题:

write a short essay based on the following chart. in your writing, you should:

1) interpret the chart and

2) give your comments

you should write at least 150 words

write your essay on answer sheet 2 (15 points)

2008、2009 年国内轿车市场部分【品牌份额示意图】

2011 年考研英语二大作文范文

This bar chart indicates different market shares of automobiles of three types of brand affiliations between 2008 and 2009.

In 2008, cars with Japanese brands topped the three types of vehicles, accounting for 35% of the total market. What follows is the cars with Chinese brands, hitting 25% of the auto market, with the share of American brand bottomed out at 15%. In 2009, some developments are noticeable in that the cars with the largest share became those of Chinese brands, which occupied roughly 32% of the market, while cars with Japanese and American brands took 25% and 15% of the whole market respectively.

It is observed that between 2008 and 2009, cars of Chinese and Japanese brands took turns to be the No.1 in terms of market share while those with American brands ranked the last in both years. And the share of Chinese-brand cars witnessed a mild increase and that of the

Japanese-brand cars saw a moderate decrease, while the American-brand cars stayed the same.

From this graph, we can come to the safe conclusion that the Chinese automakers are doing a good job in outcompeting their Japanese and American counterparts in 2009, but the gap is not so significant and if no efforts were made from the part of the Chinese auto industry, the distribution map might be rewritten in the future.

分析:

今年考研英语二的作文不是很难。小作文是常见的书信体，要求写一封祝贺信。祝贺信的写法比较简单，题目也给出了写作的思路，按照题目的要求来写就可以。首先祝贺对方被大学录取，然后给出一些建议，做好准备，迎接大学的生活。最后再次祝贺对方，表达良好的愿望。

大作文是考纲规定的图画作文。图片描述的内容是国产、日系、美系品牌汽车在 2008 年和 2009 年销售情况的变化。美系品牌汽车两年间基本没有变化，但国产汽车与日系汽车相反，前者所占的份额上升，后者所占的份额是下降的。写作的时候需要首先描述一下图片的内容，然后主要分析一下造成这种现象的原因，需要引起注意的事情等。
